

# BORA

# MITERIX™

ANGLE DUPLICATOR

Works with any angle  
- internal or external  
from 0 - 180 degrees.

Makes it easy to  
transfer angles straight  
to your miter saw

Collapsible and  
foldable for easy  
storage in your  
tool box

1

Find It.

2

Divide It.

3

Cut It.

Cutting perfect miters just became the easiest part of the job with the Bora MiteriX Angle Duplicator. Use this tool to measure the exact miter angle you need to cut. Then lock it and transfer that exact angle to your miter saw. It divides the angle in half for the perfect miter - couldn't be easier. From crown molding and wood casing to baseboard and trim, this tool will save you hours of frustration and wasted material.
