Knockabout

MODEL KT3300

Hydraulic Dumping Bed

The KT3300 comes standard with a hand-operated, double-action hydraulic pump. The pump powers a 2500 PSI lift cylinder to effortlessly lift a full load in the dump bed. The hydraulic system is also capable of being operated with tractor hydraulics or an optional 12v hydraulic pump, paired with a 12v battery for constant power.

Ample Ground Clearance

With 23-inch turf tires, the Knockabout KT3300 gives you 10 inches of ground clearance to work with. This allows you to navigate over things like stumps and branches on your property. The walking-beam axle ensures a smooth ride over rough terrain.

Built for the load

The KT3300 can haul up to 3000 lbs, making it perfect for heavy loads. Its 14-gauge powder-coated steel slide-out tailgate keeps your cargo contained and secure while moving, allowing you to easily transport landscaping materials or large items without seeing them slide off the back.

Bed Size

The KT3300 has 33 cubic feet of space, providing plenty of room for your outdoor needs. From property maintenance to gardening, the Knockabout Trailer provides the means to accomplish your goals.
