Weasler®

INTRODUCING! Econo-Baler CV Shafts

PART# 14586449

Now Available for Vermeer models 504, 505 MCL, 5400, 5410 & 5500 Rebel

**May fit other models. Please verify configuration before ordering*

- Interchangeable with several popular brand models
- Tri-lobe profile telescoping members
- Utilizes Weasler's patented 80° CV Joint for optimal performance
- Includes ratchet clutch for overload protection
- Easy Lock Guard allows quick and easy PTO shield removal and reassembly
- Adjustable design or cut-to-length

ALSO AVAILABLE!

CV Driveline Replacements for John Deere Round Balers

PTO SHAFTS & COMPONENTS

As the Northeast Regional Distributor for Weasler, we stock an expansive amount of domestic, metric, and constant velocity drivelines as well as components. We offer direct replacement drivelines and components that provide simple solutions for customizing or repairing your applications.

ToolboxTips — Identifying Your PTO Driveline

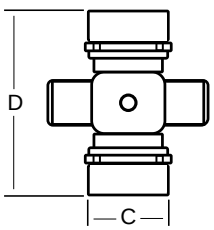

Step 1

Is your PTO Domestic (North American) or Metric? One of the easiest ways to figure that out is to determine the shape of the telescoping tubing and shafting. As a general rule, if the shafting/tubing is square, rectangular, hex or splined, it will be Domestic (North American). Metric is usually three-pointed, star or lemon shaped.

Step 2 (Domestic - see following page for metric)

The next step is to determine the **series** of your shaft. The most accurate approach is to obtain two measurements from the cross and bearing kit (u-joint) located on the tractor or drive end of the PTO.

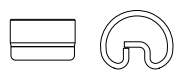

Bearing Cap Diameter – This measurement is the outside diameter of the cap itself, **C**. This would also be the same as the inside diameter of the hole in the yoke ears. Most cross kits (u-joints) have uniform cap diameters; however, some Constant Velocity (CV) drive-lines have differing cap measurements. Be sure to measure all the caps to correctly identify the series of your PTO.

Cross Kit Width – This is the measurement of the u-joint, end-of-cap to end-of-cap, **D**. You should also measure the cross both ways as some series are not uniform in their width. The most accurate way to obtain these specs is to remove the cross kit from the yokes. You can "estimate" by measuring across the yoke ears and allowing for the indentation of the bearing cap, but to get the most accurate number, the end-of-cap to end-of-cap measurement of a removed u-joint is best.

Snap Ring Location – One other determining factor when measuring cross kits is to look for the snap ring location. Some are located in the bushing and these are called internal snap rings. The other style is situated in the yoke ears and these are identified as external snap rings.

TIMKEN BELTS

The Right Belt for the Job®

Performance Driven. Performance Proven.

Save Energy and Reduce Downtime with Premium Performance Timken Belts

Super II® V-Belt

The Problem Solver!

The solution to the constant and costly problem of replacing ordinary v-belts on troublesome drives. Super II® belts are made of Ethylene Propylene Diene Monomer (EPDM) that is durable and resistant to oil, heat, hardening and glazing.

Uses: HVAC, blowers, pumps, shaker screens, fans and more

Aramax® Xtra Duty V-Belt

Performance Proven!

Made with tough Aramid cord and a brown smooth clutching cover, Aramax® XDV belts are designed for outdoor power equipment, delivering high horsepower and long service life.

Uses: Lawn mowers, edgers, snow throwers and more

Gold-Ribbon® Cog-Belt®

The Energy Saver!

Combines the advantages of EPDM with the superior flexing of precision molded cogs and gripping power of raw edge sidewalls to provide high energy efficiency, power ratings and long belt life.

Uses: HVAC, blowers, pumps, fans and more

HOSE FITTINGS & ADAPTERS

All the hose adapters, quick couplers, bulkheads, and fittings to make those connections. You will find a large selection of poly, brass, aluminum, and stainless steel from brands such as Norwesco and Banjo. Choose flange fittings for those hard-to-reach areas or schedule 80 poly for the more demanding applications.

POLY BALL VALVES & STRAINERS

We have union, 3-way, and heavy-duty bolted ball valves for tanks, sprayers, and other liquid transfer applications. We stock various configurations and styles, like the unique “stubby valves” and IBC tote valves and mounting brackets. Make sure that your equipment remains clog-free by installing a quality inline strainer.

SPRAYER NOZZLES

If you want to upgrade your sprayer nozzles or set up a new sprayer, we have top-quality TeeJet broadcast, banding, and boomless nozzles. You will find everything from standard flat fan, air induction, dual spray, to offset spray patterns here.

ToolboxTips — Sprayer Nozzle Technical Chart

Useful Formulas

$$\text{GPM (Per Nozzle)} = \frac{\text{GPA} \times \text{MPH} \times \text{W}}{5{,}940}$$

$$\text{GPM (Per Nozzle)} = \frac{\text{GAL/1000FT}^2 \times \text{MPH} \times \text{W}}{136}$$

$$\text{GPA} = \frac{5{,}940 \times \text{GPM (Per Nozzle)}}{\text{MPH} \times \text{W}}$$

$$\text{GAL/1000FT}^2 = \frac{136 \times \text{GPM (Per Nozzle)}}{\text{MPH} \times \text{W}}$$

GPM -Gallons Per Minute
GPA -Gallons Per Acre
GAL/1000FT² - Gallons Per 1000 Square Feet
MPH -Miles Per Hour
W -Nozzle spacing (in inches) for broadcast spraying
-Spray width (in inches) for single nozzle, band spraying or boomless spraying
-Row spacing (in inches) divided by the number of nozzles per row for directed spraying

Useful Formulas for Roadway Applications

$$\text{GPLM} = \frac{60 \times \text{GPM}}{\text{MPH}} \qquad \text{GPM} = \frac{\text{GPLM} \times \text{MPH}}{60}$$

GPLM = Gallons Per Lane Mile

Note: GPLM is not a normal volume per unit area measurement. It is a volume per distance measurement. Increases or decreases in lane width (swath width) are not accommodated by these formulas.

Measuring Travel Speed

Measure a test course in the area to be sprayed or in an area with similar surface conditions. Minimum lengths of 100 and 200 feet are recommended for measuring speeds up to 5 and 10 MPH, respectively. Determine the time required to travel the test course. To help ensure accuracy, conduct the speed check with a partially loaded (about half full) sprayer and select the engine throttle setting and gear that will be used when spraying. Repeat the above process and average the times that were measured. Use the following equation or the table at right to determine ground speed.

$$\text{Speed (MPH)} = \frac{\text{Distance(FT)} \times 60}{\text{Time (seconds)} \times 88}$$

Suggested Minimum Spray Heights

The nozzle height suggestions in the table below are based on the minimum overlap required to obtain uniform distribution. However, in many cases, typical height adjustments are based on a 1 to 1 nozzle spacing to height ratio. For example, 110° flat spray tips spaced 20 inches apart are commonly set 20 inches above the target.

* Not recommended
** Nozzle height based on 30° to 45° angle of orientation
**** Wide angle spray tip height is influenced by nozzle orientation. The critical factor is to achieve a double spray pattern overlap.

Disinfect System Base

CropCare®'s Truck Disinfect System is a sanitation, biosecurity kit engineered to provide optimal spraying capabilities. It helps to prevent the highly pathogenic avian influenza and other animal diseases and to control the threat of infection. The Truck Disinfect System integrates many of the necessary common components to apply disinfectant with an undercarriage decontamination system. The system is easy to use and effective for commercial vehicles serving the intensive animal production industries.

AG EQUIPMENT & FLEET CARE

LUBRICANTS & CHEMICALS

Keep your shop equipment running or an entire fleet in tip-top shape, from sealants and penetrating fluids to rust treatment, hydraulic fluids, grease, and motor oil. We carry the premium brands you trust, such as Warren, Amsoil, Pride, WD-40, Permatex, Blaster, 2+2, Pennzoil, and Castrol.

ToolboxTips — Oil Viscosity Chart

X = Viscosity when cold
measured at various temperatures

xW–y

W = *Winter*

y = Viscosity when hot
measured at 212 °F (100 °C)

Oil with a lower number means it will remain more liquid when cold. The more liquid, the more easily it can be pumped, filtered, and drained.

If you live in a cold region, 0W-20 or 5W-30 oils ensure easier start-ups and better engine protection. These oils are more fluid and will meet the requirements of newer engines.

Oil with a higher number means it will remain thicker even at higher temperatures. Thicker oil is a better lubricant in high heat.

Hot countries have developed oils such as 15W-40 or 20-50 that are more viscous and better-suited for old engines.

Hose Reel 3/4 in x 25 ft Fuel RS

COXREELS® SH Series Super Hub™ Spring Driven Hose Reels, like the P Series, have a long history of dependable performance. The larger chassis and frame accommodate longer lengths and larger diameters of hose. COXREELS® original Super Hub™ dual axle support system increases the stability during operation, reduces vibration and strengthens the structural integrity of the reel.

SKU# SHFN525.....$619.99

Hose Reel 1 in x 35 ft Fuel RS

COXREELS® fuel dispensing reels are designed to handle various non-aromatic fuel applications including diesel, kerosene, fuel oil and heating oil. COXREELS® professional fuel dispensing supreme duty dual pedestal (T Series) reels are an essential component found in utility, ground support and bulk liquid handling transport services mounted on fuel storage and dispensing systems, fuel/lube trucks, aircraft refuelers and tank trucks. The convenient uncoiling systems with the added hose control allow the operator to efficiently handle fuel transfers.

Type IA Fiberglass Leaning Ladder

The L6204 Fiberglass Leaning Ladder is ideal for the professional. With a duty rating of 300 pounds, it features the LEANSAFE® ladder top that secures tools and accessories and is uniquely designed to securely lean against flat wall surfaces, wall corners, poles, and wall studs, and perform as a standard step ladder. LEANSAFE® ladders have a lower rear rail to front rail connection point, allowing the user to get closer to the work when in step ladder mode. Leaning a ladder safely requires that the rear rail is latched to the front rail. Werner's patent pending single latch design stays engaged when needed and is centrally located to easily open and close.

Type IA Fiberglass Podium Ladder

The Podium Ladder is ideal for working at fixed heights and is easier to maneuver than scaffolds or lifts. The extra-large platform with toe guard feels like you are standing on the ground and 4X Work Zone allows you to work facing any direction. This ladder features full aluminum bracing and a full set of rear horizontals. The LOCKTOP™ extended guardrail provides an extra point of contact and conveniently organizes tools and accessories. The newly designed EDGE360™ gives the bottom of the ladder protection from every angle with integrated rail shield, EDGE bracing and over-sized foot pads.

ToolboxTips — Electrical Wire Guide

Recommended Circuit Lengths For Voltage Drop

Wire Size (AWG)		Rating of Circuit Breaker or Fuse in Amperes									
		15	20	30	40	50	60	70	80	90	100
Copper	14	50									
	12	65	50								
	10	105	80	55							
	8	160	120	80	60						
	6	260	195	130	100	80					
	4	410	305	205	155	120	100	85			
	2	665	500	330	250	200	165	140	125	110	110
Alum.	6	155	115	80	60	50					
	4	245	185	125	95	75	60	55			
	2	295	295	200	150	120	100	85	75	65	60

Recommended maximum circuit lengths in feet for voltage systems of 120 volts. For 240-volt systems, circuit lengths may be doubled. Note: Extremely long circuits can produce voltage losses whereby some electrical equipment may not operate properly. Following these recommend values should provide reasonable efficiency of operation.

Oatey® 1.5 in. NPT Chrome In-Line Vent

The Oatey® 1.5" NPT Chrome In-Line Vent replaces secondary plumbing vents that protect the traps in kitchens and bathrooms. This mechanical vent installs on the drain line and vents the line without allowing sewer gas to enter the home. Oatey products have earned the trust of plumbing professionals for over 100 years.

Welding Rods

ToolboxTips Welding Rod Guide

Type	Features	Application	Polarity
Lincoln Electric Fleetweld® 180	Fleetweld® 180 offers excellent arc stability for excellent performance with power sources as low as 50V open-circuit voltage (OCV). A great stick electrode with the ability to start easily on low open circuit voltage welders.		AC, DC±
Lincoln Electric Fleetweld® 35	Fleetweld® 35 is a great electrode to use on jobs where the steel isn't clean.	Proven performer for sheet metal welding applications and AC pipe welding	AC, DC±
Lincoln Electric Fleetweld® 37	We've designed Fleetweld® 37 for excellent performance with smaller AC welders with low open-circuit voltages. It's an excellent choice for jobs involving irregular or short welds that require a change in position.	All-position electrode for low amperage welding on sheet metal – especially in applications where appearance is important.	AC, DC±
Lincoln Electric Fleetweld® 47	Easy-to-use, all-position electrode features high deposition rates for fast performance.	For sheet metal lap joints and fillet welds, general purpose plate welding and maintenance jobs.	AC, DC±
Lincoln Electric Lincoln® 7018AC	A great choice for low open circuit voltage AC power sources. Cold restrikes are no problem with this versatile, all-position electrode.		AC, DC±
Lincoln Electric Jetweld® LH®-70	Offers high deposition rates.	For welding on thick sections and restrained joints when cracking is an issue. It's also a good call when the project involves hard-to weld steels.	AC, DC+
Lincoln Electric Excalibur® 7018-A1 MR	Industry premium, smooth arc, excellent strikeability, self-peeling slag and extremely low spatter levels. A low alloy, low hydrogen electrode with superior arc performance and operability	Low hydrogen stick electrode designed for all-position welding on 0.5% Molybdenum low alloy steels.	AC, DC+
Lincoln Electric Excalibur® 308/308H-16, 380L-16	Q2 Lot® - Certificate showing actual deposit chemistry and calculated ferrite number (FN) available online Designed with low carbon levels to help eliminate carbide precipitation in high temperature service Flux coating provides smooth arc transfer and slag is self-peeling for easy removal Versatile electrode designed to weld several types of austenitic steels	A743 and A744 Type CF-8 cast material Type 304 stainless steels	AC, DC+
Lincoln Electric Wearshield® ABR	Provides good resistance to abrasion, impact and some metal-to-metal wear Good hot forging properties Use on carbon, stainless and manganese steels Deposits limited to two layers Can be forged readily without affecting its mechanical properties	Crusher hammers Dozer blades Dipper teeth and lips Coal mining cutters Truck chain and gears	AC, DC+
Messer MG 80T -AC Plus	Designed to operate on almost any AC or DC welding machine even when the open circuit voltage is very low. The special coating protects the weld deposit from adverse conditions normally encountered in maintenance repair welding. Low amperage requirement controls distortion when welding thin sheet metal; spatter is kept to a minimum. Ideal for field repair work and out-of-position welding.	Fabrication of thin, medium, heavy and dissimilar gauge mild steels. Sheets, plates, angle iron, beams, pipes and machine parts can be welded in all positions. Also used for filling holes and build-up of over-machined and worn surfaces. Commonly used on applications requiring short, intermittent and spot welds because of the outstanding restarting characteristics.	AC, DC±

Milwaukee®

Nothing but **HEAVY DUTY.**®

TAPE MEASURES

Milwaukee Tool tape measures are wear and impact-resistant with nylon bond blade protection and an additional coating on the first 6" of the blade, reducing tape tear. Built to withstand the jobsite.

GREASE GUNS

The M18™ Cordless 2-Speed Grease Gun is just one of many of Milwaukee Tools Grease Guns. It delivers the highest max operating pressure in its class. The tool's stand up design and shoulder strap capability offer user convenience.

MARKING TOOLS

INKZALL™ Jobsite Markers feature clog resistant tips and the ability to write through dusty, wet or oily surfaces. For added user convenience, they have a built-in hard hat clip for easy storage and access.

HOLE SAWS

HOLE DOZER™ Hole Saw features Rip Guard™, the strongest tooth form in the industry. Built with more steel behind the cutting edge for added strength, plus an all access slot design that allows for full access during plug removal.

SAWZALL BLADES

Milwaukee Tool has a variety of Sawzall® blades for every material. Metal, Wood, Shingles, Screws, Drywall, Durock, Plaster and the list goes on. Various lengths and packaging options allow you to choose exactly what you need.

100PC SHOCKWAVE™ Impact Duty Driver Bit PACKOUT™ Set

The MILWAUKEE® SHOCKWAVE™ Impact Duty 100PC Driver Bit Set provides the Ultimate Fit for a superior driving experience. The optimized SHOCKZONE™ shanks are customized per tip type to absorb peak torque and prevent breaking. The long-lasting Wear Guard™ Tip provides increased wear resistance, protecting the fit over the life of the bit. The customized tip geometry leads to less stripping of screws on the job site. The set is organized in a customizable accessory case designed to fit in PACKOUT™ Organizers.

Chemical Resistance Chart

These recommendations are based upon information from material suppliers as well as careful examination of available published information, and are believed to be accurate. However, since the resistance of metals, plastics, and elastomers can be affected by concentration, temperature, presence of other chemicals, and other factors, this information should be considered a general guide rather than unqualified guarantee.

Ultimately, the customer must determine the suitability of the pump used in various solutions. All recommendations assume ambient temperatures unless otherwise noted. The ratings for these materials are based upon the chemical resistance only. Added consideration must be give to pump selections when the chemical is abrasive, viscous in nature, or has a specific gravity greater than 1.1.
