75 YEARS Weasler®
TRUSTED FOR GENERATIONS

Decades of driveline experience

Founder Tony Weasler, known for his creativity and innovation, built Weasler Engineering on a cornerstone of learning, listening and building relationships. For 75 years, we've focused on key values like expertise, innovation, reliability and customer experience.

This foundation continues to drive our unwavering commitment to distributors like PaulB, our partner for more than 30 years. Weasler & PaulB are committed to quality customer support and meeting your power transmission needs.

Let's solve your agricultural equipment needs together.

Welcome to the 2027 Catalog!

Thank you for trusting us as your supplier for items used every day in agriculture, manufacturing, fleet maintenance, and more. Here are a few highlights for the 2027 catalog.

NEW PRODUCT LINES AND OTHER UPDATES!

- New *Megadyne & Gates* belts.
- Improved data structure for shafts in the PTO Shafts & Components section to help you more easily identify the correct components for your tractor and implement setup.
- More easily find Bolts by size in the Fasteners section.

Quickly find these and all the other products using the Table of Contents on the previous page or the index at the back of the catalog.

Please contact us if you need any assistance or would like to provide helpful feedback.

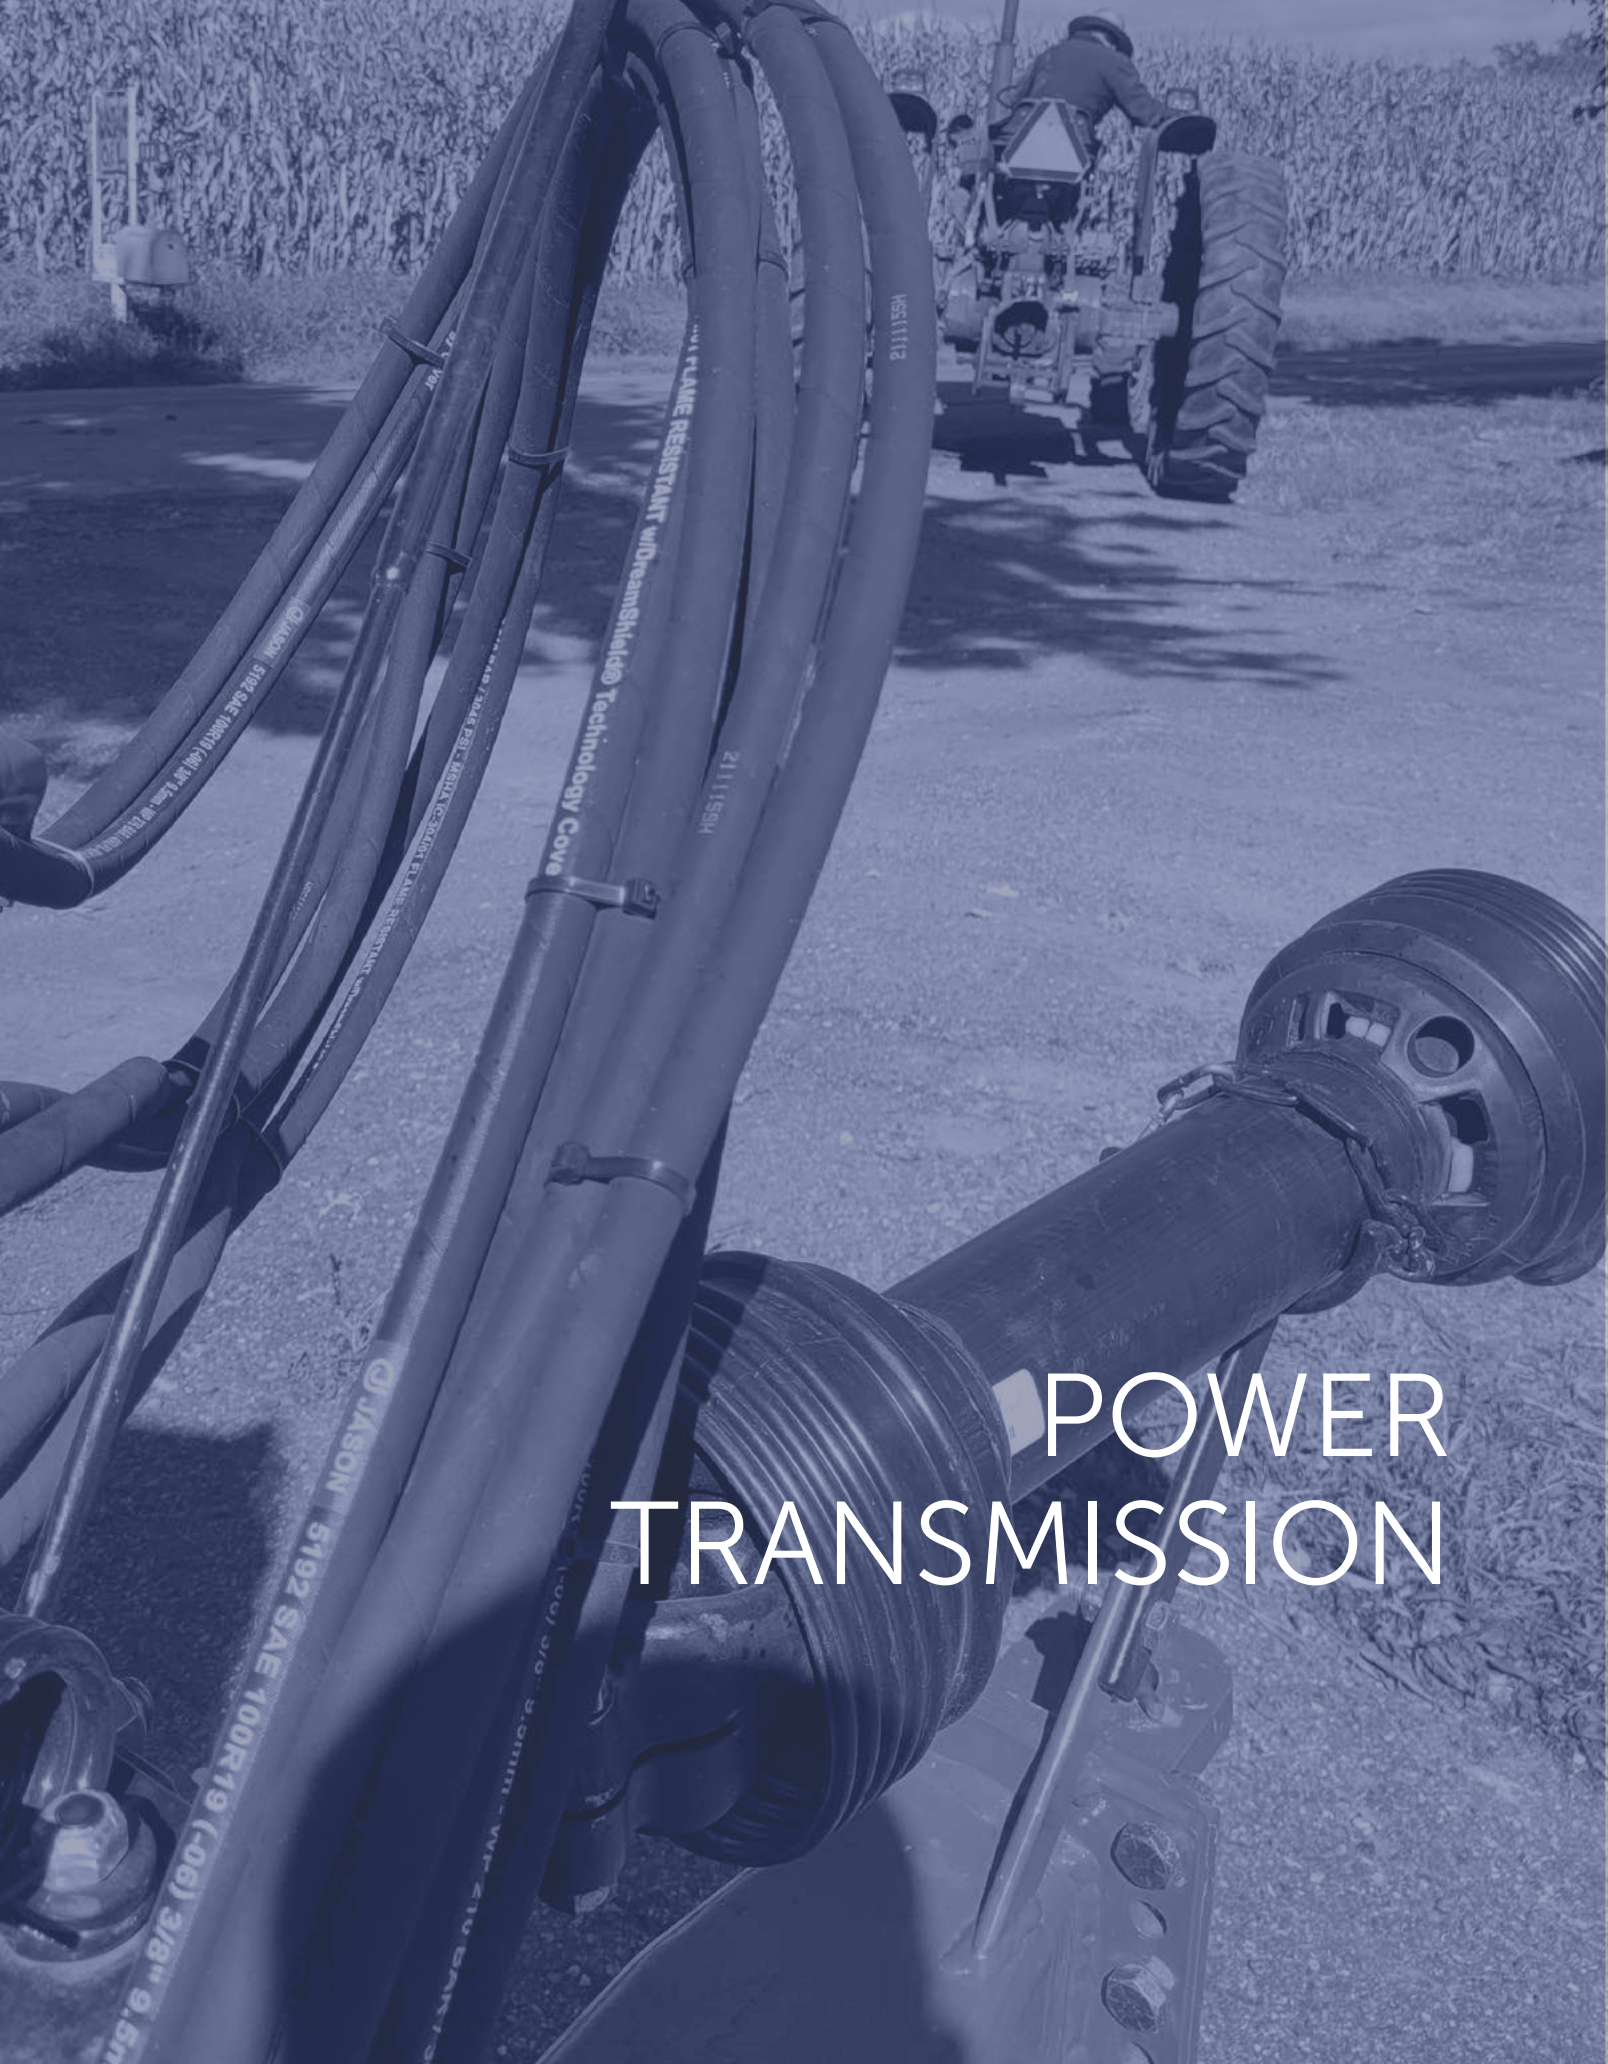

ToolboxTips

Toolbox Tips are reference charts, graphs and formulas. Tips include a PTO horsepower chart, a GPM formula for spray nozzles, a hydraulic adapter quick reference, and much more.

PTO SHAFTS & COMPONENTS

As the Northeast Regional Distributor for Weasler, we stock an expansive amount of domestic, metric, and constant velocity drivelines as well as components. We offer direct replacement drivelines and components that provide simple solutions for customizing or repairing your applications.

ToolboxTips — Identifying Your PTO Driveline

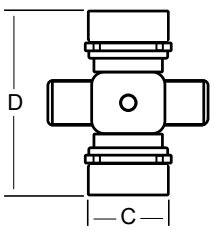

Step 1

Is your PTO Domestic (North American) or Metric? One of the easiest ways to figure that out is to determine the shape of the telescoping tubing and shafting. As a general rule, if the shafting/tubing is square, rectangular, hex or splined, it will be Domestic (North American). Metric is usually three-pointed, star or lemon shaped.

Step 2 (Domestic - see following page for metric)

The next step is to determine the **series** of your shaft. The most accurate approach is to obtain two measurements from the cross and bearing kit (u-joint) located on the tractor or drive end of the PTO.

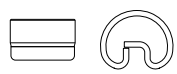

Bearing Cap Diameter – This measurement is the outside diameter of the cap itself, **C**. This would also be the same as the inside diameter of the hole in the yoke ears. Most cross kits (u-joints) have uniform cap diameters; however, some Constant Velocity (CV) drive-lines have differing cap measurements. Be sure to measure all the caps to correctly identify the series of your PTO.

Cross Kit Width – This is the measurement of the u-joint, end-of-cap to end-of-cap, **D**. You should also measure the cross both ways as some series are not uniform in their width. The most accurate way to obtain these specs is to remove the cross kit from the yokes. You can "estimate" by measuring across the yoke ears and allowing for the indentation of the bearing cap, but to get the most accurate number, the end-of-cap to end-of-cap measurement of a removed u-joint is best.

Snap Ring Location – One other determining factor when measuring cross kits is to look for the snap ring location. Some are located in the bushing and these are called internal snap rings. The other style is situated in the yoke ears and these are identified as external snap rings.

HOSE FITTINGS & ADAPTERS

All the hose adapters, quick couplers, bulkheads, and fittings to make those connections. You will find a large selection of poly, brass, aluminum, and stainless steel from brands such as Norwesco and Banjo. Choose flange fittings for those hard-to-reach areas or schedule 80 poly for the more demanding applications.

SPRAYER NOZZLES

If you want to upgrade your sprayer nozzles or set up a new sprayer, we have top-quality TeeJet broadcast, banding, and boomless nozzles. You will find everything from standard flat fan, air induction, dual spray, to offset spray patterns here.

ToolboxTips — Sprayer Nozzle Technical Chart

Useful Formulas

$$\text{GPM (Per Nozzle)} = \frac{\text{GPA} \times \text{MPH} \times \text{W}}{5{,}940}$$

$$\text{GPM (Per Nozzle)} = \frac{\text{GAL/1000FT}^2 \times \text{MPH} \times \text{W}}{136}$$

$$\text{GPA} = \frac{5{,}940 \times \text{GPM (Per Nozzle)}}{\text{MPH} \times \text{W}}$$

$$\text{GAL/1000FT}^2 = \frac{136 \times \text{GPM (Per Nozzle)}}{\text{MPH} \times \text{W}}$$

GPM -Gallons Per Minute
GPA -Gallons Per Acre
GAL/1000FT² - Gallons Per 1000 Square Feet
MPH -Miles Per Hour
W -Nozzle spacing (in inches) for broadcast spraying
-Spray width (in inches) for single nozzle, band spraying or boomless spraying
-Row spacing (in inches) divided by the number of nozzles per row for directed spraying

Useful Formulas for Roadway Applications

$$\text{GPLM} = \frac{60 \times \text{GPM}}{\text{MPH}} \qquad \text{GPM} = \frac{\text{GPLM} \times \text{MPH}}{60}$$

GPLM = Gallons Per Lane Mile

Note: GPLM is not a normal volume per unit area measurement. It is a volume per distance measurement. Increases or decreases in lane width (swath width) are not accommodated by these formulas.

Measuring Travel Speed

Measure a test course in the area to be sprayed or in an area with similar surface conditions. Minimum lengths of 100 and 200 feet are recommended for measuring speeds up to 5 and 10 MPH, respectively. Determine the time required to travel the test course. To help ensure accuracy, conduct the speed check with a partially loaded (about half full) sprayer and select the engine throttle setting and gear that will be used when spraying. Repeat the above process and average the times that were measured. Use the following equation or the table at right to determine ground speed.

$$\text{Speed (MPH)} = \frac{\text{Distance(FT)} \times 60}{\text{Time (seconds)} \times 88}$$

Suggested Minimum Spray Heights

The nozzle height suggestions in the table below are based on the minimum overlap required to obtain uniform distribution. However, in many cases, typical height adjustments are based on a 1 to 1 nozzle spacing to height ratio. For example, 110° flat spray tips spaced 20 inches apart are commonly set 20 inches above the target.

* Not recommended
** Nozzle height based on 30° to 45° angle of orientation
**** Wide angle spray tip height is influenced by nozzle orientation. The critical factor is to achieve a double spray pattern overlap.

Disinfect System Base - 25 Gallon

CropCare®'s Truck Disinfect System is a sanitation, biosecurity kit engineered to provide optimal spraying capabilities. It helps to prevent the highly pathogenic avian influenza and other animal diseases and to control the threat of infection. The Truck Disinfect System integrates many of the necessary common components to apply disinfectant with an undercarriage decontamination system. The system is easy to use and effective for commercial vehicles serving the intensive animal production industries.

AG EQUIPMENT & FLEET CARE

LUBRICANTS & CHEMICALS

Keep your shop equipment running or an entire fleet in tip-top shape, from sealants and penetrating fluids to rust treatment, hydraulic fluids, grease, and motor oil. We carry the premium brands you trust, such as Warren, Amsoil, Pride, WD-40, Permatex, Blaster, 2+2, Pennzoil, and Castrol.

ToolboxTips — Oil Viscosity Chart

X = Viscosity when cold
measured at various temperatures

xW–y

W = *Winter*

y = Viscosity when hot
measured at 212 °F (100 °C)

Oil with a lower number means it will remain more liquid when cold. The more liquid, the more easily it can be pumped, filtered, and drained.

If you live in a cold region, 0W-20 or 5W-30 oils ensure easier start-ups and better engine protection. These oils are more fluid and will meet the requirements of newer engines.

Oil with a higher number means it will remain thicker even at higher temperatures. Thicker oil is a better lubricant in high heat.

Hot countries have developed oils such as 15W-40 or 20-50 that are more viscous and better-suited for old engines.

Hose Reel 3/4 in x 25 ft Fuel RS

COXREELS® SH Series Super Hub™ Spring Driven Hose Reels, like the P Series, have a long history of dependable performance. The larger chassis and frame accommodate longer lengths and larger diameters of hose. COXREELS® original Super Hub™ dual axle support system increases the stability during operation, reduces vibration and strengthens the structural integrity of the reel.

SKU# SHFN525.....$619.99

Hose Reel 1 in x 35 ft Fuel RS

COXREELS® fuel dispensing reels are designed to handle various non-aromatic fuel applications including diesel, kerosene, fuel oil and heating oil. COXREELS® professional fuel dispensing supreme duty dual pedestal (T Series) reels are an essential component found in utility, ground support and bulk liquid handling transport services mounted on fuel storage and dispensing systems, fuel/lube trucks, aircraft refuelers and tank trucks. The convenient uncoiling systems with the added hose control allow the operator to efficiently handle fuel transfers.

Power Converters

ProMariner ProSport Cupholder Inverter - 12V-110V AC

The ProMariner ProSport Cupholder Inverter is the ideal solution for active users on the water or on the road, allowing you to convert 12V battery power to 110VAC for powering various devices. Designed to fit snugly into a standard cupholder, this compact inverter provides instant AC power up to 150 watts. It inludes a standard 110VAC receptacle and comes with a 3-foot DC cable.

SKU# DC979018 ..... $39.99

SlimLine AC Inverter 1000 Watt (MSW)

The SlimLine 1000 Watt AC Inverter combines a high-performance, compact design with Wagan Tech's signature 'TrueRated' power. Unlike standard inverters, this unit is tested to deliver a full 1,000 watts of continuous power for 24 hours straight. It features three standard US AC outlets and dual USB ports (3.0A shared) to power home electronics and mobile devices simultaneously.

SKU# EL3720 ..... $169.99

AC 120V to DC 12V Power Adapter

This UL Listed 10A AC to 12V DC power adapter from Wagan Tech allows you to power your car appliances and accessories anywhere with a wall outlet. It's ideal for school, home, or office use, and can be used with various devices like cooler/warmers, air compressors, smartphone chargers, heated seat cushions, and more.

Type IA Fiberglass Leaning Ladder

The L6204 Fiberglass Leaning Ladder is ideal for the professional. With a duty rating of 300 pounds, it features the LEANSAFE® ladder top that secures tools and accessories and is uniquely designed to securely lean against flat wall surfaces, wall corners, poles, and wall studs, and perform as a standard step ladder. LEANSAFE® ladders have a lower rear rail to front rail connection point, allowing the user to get closer to the work when in step ladder mode. Leaning a ladder safely requires that the rear rail is latched to the front rail. Werner's patent pending single latch design stays engaged when needed and is centrally located to easily open and close.

Type IA Fiberglass Podium Ladder

The Podium Ladder is ideal for working at fixed heights and is easier to maneuver than scaffolds or lifts. The extra-large platform with toe guard feels like you are standing on the ground and 4X Work Zone allows you to work facing any direction. This ladder features full aluminum bracing and a full set of rear horizontals. The LOCKTOP™ extended guardrail provides an extra point of contact and conveniently organizes tools and accessories. The newly designed EDGE360™ gives the bottom of the ladder protection from every angle with integrated rail shield, EDGE bracing and over-sized foot pads.

ToolboxTips — Electrical Wire Guide

Recommended Circuit Lengths For Voltage Drop

Wire Size (AWG)		Rating of Circuit Breaker or Fuse in Amperes									
		15	20	30	40	50	60	70	80	90	100
Copper	14	50									
	12	65	50								
	10	105	80	55							
	8	160	120	80	60						
	6	260	195	130	100	80					
	4	410	305	205	155	120	100	85			
	2	665	500	330	250	200	165	140	125	110	110
Alum.	6	155	115	80	60	50					
	4	245	185	125	95	75	60	55			
	2	295	295	200	150	120	100	85	75	65	60

Recommended maximum circuit lengths in feet for voltage systems of 120 volts. For 240-volt systems, circuit lengths may be doubled. Note: Extremely long circuits can produce voltage losses whereby some electrical equipment may not operate properly. Following these recommend values should provide reasonable efficiency of operation.

Sch40 PVC Pipe & Fittings

Oatey® 1.5 in. NPT In-Line Vent

The Oatey® 1.5" NPT In-Line Vent replaces secondary plumbing vents that protect the traps in kitchens and bathrooms. This mechanical vent installs on the drain line and vents the line without allowing sewer gas to enter the home. Oatey products have earned the trust of plumbing professionals for over 100 years.

Hercules® 8 oz. Below Zero PVC Regular Body Clear Cement

Hercules® Below Zero-PVC Regular Body Fast Set Clear Cement is recommended for potable water, pressure pipe, conduit and DWV applications. It can be used down to -10 °F (-23 °C)/4°C to 43°C and is easy to apply with included in-lid dauber. This clear, low VOC, regular bodied, fast set cement can be used to solvent weld all schedules and classes of PVC pipe and fittings up to 6 in. diameter with interference fit. Behold the power of Hercules®, products built to last and trusted by plumbers to withstand even the toughest conditions.

Solder & Flux

60/40 Leaded Rosin Core Solder (1 lb Spool) 1/8 in.

60/40 tin-lead rosin core solder is a popular choice for soldering for electrical and electronic connections. Rosin core solders are generally used for small connections as there is a limited amount of flux available for protecting large surface areas. Heat sources include soldering guns, irons and torch applications. Lead bearing solders are not to be used in potable water system applications.

SKU# HA60R61 ..... $79.99

8 oz 1/16 in Silvery White Rosin Core Electrical Repair Solder Wire

Solder wires usually have a core inside the wire containing flux. Flux is designed to improve electrical contact and mechanical strength in solder joints.

X-Series 140 MIGX Welder

The Forney® 140 MIGx is a 120V MIG and flux-cored welder featuring TruSet™ that makes dialing in a good arc as simple as choosing your wire, turning a knob, and pulling the trigger. TruSet™ technology, a bright passive LCD display, and a straightforward two-knob interface help you get welding quickly, while the 140 amp inverter output handles 24 ga through 1/4 in. material in a single pass. Backed by a 3-year warranty and Forney® Industries' 90+ years of welding experience, this TruSet™ MIG welder gives DIYers and small shops a portable, gas-ready machine that can run both solid wire with gas and gasless flux-cored wire.

Weld-Pak 180i MP DV Welder

The WELD-PAK® 180i MP DV welding machine is a lightweight and portable welder that connects to 120-Volt or 230-Volt power. This machine is an excellent choice for MIG, Stick, Flux-Cored and DC TIG welding. The intuitive user interface, easy setup and full list of accessories permits welding in no-time.The simple two knob control allows easy set up between the welding process. With the ability to switch to multiple processes you'll be ready to tackle any project. The Lincoln Electric WELD PAK® 180i MP DV is an excellent choice!

Welding Rods

ToolboxTips Welding Rod Guide

Type	Features	Application	Polarity
Lincoln Electric Fleetweld® 180	Fleetweld® 180 offers excellent arc stability for excellent performance with power sources as low as 50V open-circuit voltage (OCV). A great stick electrode with the ability to start easily on low open circuit voltage welders.		AC, DC±
Lincoln Electric Fleetweld® 35	Fleetweld® 35 is a great electrode to use on jobs where the steel isn't clean.	Proven performer for sheet metal welding applications and AC pipe welding	AC, DC±
Lincoln Electric Fleetweld® 37	We've designed Fleetweld® 37 for excellent performance with smaller AC welders with low open-circuit voltages. It's an excellent choice for jobs involving irregular or short welds that require a change in position.	All-position electrode for low amperage welding on sheet metal – especially in applications where appearance is important.	AC, DC±
Lincoln Electric Fleetweld® 47	Easy-to-use, all-position electrode features high deposition rates for fast performance.	For sheet metal lap joints and fillet welds, general purpose plate welding and maintenance jobs.	AC, DC±
Lincoln Electric Lincoln® 7018AC	A great choice for low open circuit voltage AC power sources. Cold restrikes are no problem with this versatile, all-position electrode.		AC, DC±
Lincoln Electric Jetweld® LH®-70	Offers high deposition rates.	For welding on thick sections and restrained joints when cracking is an issue. It's also a good call when the project involves hard-to weld steels.	AC, DC+
Lincoln Electric Excalibur® 7018-A1 MR	Industry premium, smooth arc, excellent strikeability, self-peeling slag and extremely low spatter levels. A low alloy, low hydrogen electrode with superior arc performance and operability	Low hydrogen stick electrode designed for all-position welding on 0.5% Molybdenum low alloy steels.	AC, DC+
Lincoln Electric Excalibur® 308/308H-16, 380L-16	Q2 Lot® - Certificate showing actual deposit chemistry and calculated ferrite number (FN) available online Designed with low carbon levels to help eliminate carbide precipitation in high temperature service Flux coating provides smooth arc transfer and slag is self-peeling for easy removal Versatile electrode designed to weld several types of austenitic steels	A743 and A744 Type CF-8 cast material Type 304 stainless steels	AC, DC+
Lincoln Electric Wearshield® ABR	Provides good resistance to abrasion, impact and some metal-to-metal wear Good hot forging properties Use on carbon, stainless and manganese steels Deposits limited to two layers Can be forged readily without affecting its mechanical properties	Crusher hammers Dozer blades Dipper teeth and lips Coal mining cutters Truck chain and gears	AC, DC+
Messer MG 80T -AC Plus	Designed to operate on almost any AC or DC welding machine even when the open circuit voltage is very low. The special coating protects the weld deposit from adverse conditions normally encountered in maintenance repair welding. Low amperage requirement controls distortion when welding thin sheet metal; spatter is kept to a minimum. Ideal for field repair work and out-of-position welding.	Fabrication of thin, medium, heavy and dissimilar gauge mild steels. Sheets, plates, angle iron, beams, pipes and machine parts can be welded in all positions. Also used for filling holes and build-up of over-machined and worn surfaces. Commonly used on applications requiring short, intermittent and spot welds because of the outstanding restarting characteristics.	AC, DC±

Anti-Spatter & Nozzle Shield - 14.5 oz

This biodegradable, water-based anti-spatter compound is silicone-free, water-soluble, and paint-compatible. It is also non-toxic and non-flammable.

SKU# W11114OZ $11.99

Plant Oil Based Anti-Spatter - 16 oz

This anti-spatter is a plant oil based, heat-resistant formulation that provides a uniform coating to prevent spatter buildup on MIG nozzles, tips, fixtures, and materials during welding applications. It is non-toxic, non-irritating, readily biodegradable, and importantly, contains no silicone materials or chlorinated solvents. The formulation is dissolved in a liquified gas propellant.

SHOCKWAVE™ Impact Duty Driver Bit PACKOUT™ Set (100pc)

The MILWAUKEE® SHOCKWAVE™ Impact Duty 100PC Driver Bit Set provides the Ultimate Fit for a superior driving experience. The optimized SHOCKZONE™ shanks are customized per tip type to absorb peak torque and prevent breaking. The long-lasting Wear Guard™ Tip provides increased wear resistance, protecting the fit over the life of the bit. The customized tip geometry leads to less stripping of screws on the job site. The set is organized in a customizable accessory case designed to fit in PACKOUT™ Organizers.

Chemical Resistance Chart

These recommendations are based upon information from material suppliers as well as careful examination of available published information, and are believed to be accurate. However, since the resistance of metals, plastics, and elastomers can be affected by concentration, temperature, presence of other chemicals, and other factors, this information should be considered a general guide rather than unqualified guarantee.

Ultimately, the customer must determine the suitability of the pump used in various solutions. All recommendations assume ambient temperatures unless otherwise noted. The ratings for these materials are based upon the chemical resistance only. Added consideration must be give to pump selections when the chemical is abrasive, viscous in nature, or has a specific gravity greater than 1.1.
